

Strata Collection

*Textured cabinet doors,
drawer fronts and
accessories in sleek
contemporary designs*

- Available in Slab, 3-Piece and 5-Piece construction.
- Mix and match door and drawer front designs within projects.
- Material offers significant cost savings vs. wood.
- Shorter lead-times since no finishing is necessary.
- Highly durable material is resistant to scratches, dents, and fingerprints.
- Treated with microbiologically tested technology that incorporates antibacterial silver ions, reducing bacteria by up to 99.9% within 24 hours of contact.
- Products offer a high level of stability that withstand warping and bowing, even in high humidity or arid environments.
- Made with sustainable materials including wood chips, fiber and recycled wood makes the collection an environmentally friendly choice.

What are

Thermally Textured Surfaces?

TTS is a highly durable material featuring a variety of textured surfaces ranging from deep linear patterns to embossed grains that align perfectly with cathedrals and other characteristics within the grain. It is thermally fused onto a CARB2/TSCA compliant core. This alternative material provides lifelike depth in both look and feel, offering the most realistic textured product in the industry.

Sequential Grain Match - Light Carbon SO15 shown

Sequential Grain Match

- The Sequential Grain Match option is available with Slab doors and drawer fronts only - upcharge applies.
- Vertical and horizontal grain orientation is available.
- Sequence matching will flow through all associated parts within individual cabinets (maximum of six pieces per configuration).
- Grain will not be sequenced from cabinet to cabinet.
- The maximum cabinet size for the Sequential Grain Match option is 79" x 96" vertical grain, or 96" x 79" horizontal grain.
- Sequential Grain Match templates are available to quickly and easily order sequentially matched products. These templates identify the position and sequence of the doors and drawer fronts within each cabinet.
- Contact your Sales Representative or Customer Service for additional information.

Non-Sequenced Grain

- This is our standard method of production.
- Each door and drawer front will have its own random grain pattern.
- Vertical and Horizontal grain orientation is available with no upcharge.
