

Vogue Collection

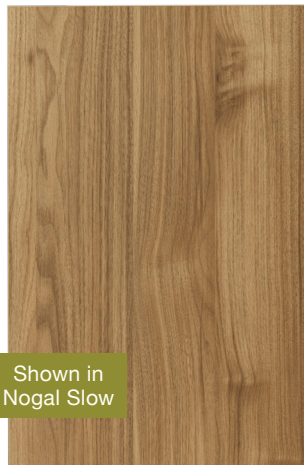

*Looks like wood.
Feels like wood.
Wears like iron.*

Vogue Thermally Textured Surfaces bring true beauty, high durability and super practicality to a variety of spaces in both homes and businesses. Whether residential kitchens or baths, retail or commercial environments, or even institutional settings such as schools or medical offices, Vogue's surfaces feature an antibacterial property that kills up to 99% of bacterial load within 24 hours of contact for the lifetime of the product.

Vogue's subtle embossed textures provide the look and feel of real wood, but offer superior stability in extreme environments. As tough as it is appealing, the Vogue Collection provides design flexibility at a surprisingly attractive price point.
